LA TINTORIA

PT. ECO LAUNDRY HIJAU INDONESIA

Natural Garment Dye

Why settle for conventional synthetic dyes when you can choose a more vibrant and eco-friendly natural dyeing option?

By extracting pigments from sources like indigo, madder root, or turmeric, natural dyeing creates beautiful, often subtle colour variations and patterns that enhance the clothing's aesthetic while minimizing environmental impact.

These dyes are biodegradable, non-allergenic, and non-toxic, making them a safe and sustainable choice for your customers. With natural dyes, you're not just offering beautiful, rich colours, you're also supporting environmental responsibility and tradition.

Choose natural dyes for your garments and join the movement towards a greener, more mindful future.

Natural Piaments

Common Name: Mulberry leaves

Botanical Name: Morns alba
